Subject: FW: Rolling Knolls Additional PFAS Investigation Request
Attachments: Response to USEPA re PFAS investigation.pdf

See attached response from the Group. Basically they're proposing to first do additional GW sampling from the existing well network and determine where new wells would be needed. They want to hold off on soil/surface water/porewater/sediment sampling pending results of the additional sampling and the regulatory status of PFAS...

They are also requesting a meeting to discuss the work plan and a 30 day extension to submit it.

I think the work plan should encompass all 5 items we requested, but what do you all think?

Thanks,
Rupika

Hi John,

Following up on our conversation regarding the presence of PFAS in groundwater at the Rolling Knolls Landfill Superfund Site, EPA is requesting additional investigations to fully characterize and delineate the nature and extent of PFAS at the Site. Please see the request in the attached letter. Let me know if you have any questions. Thanks.

Sincerely,

Rupika Ketu
